Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-62 drawn to a structure having light emissive region classified in class 313, subclass 483.
- II. Claims 63-96, drawn to method of making structure having light emissive regions, classified in class 427, subclass 66.

Inventions of Group I and Group II are related as product and process of making it. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process. For example, the product as claimed can be made as follows: first providing light reflective material over light emissive particles arranged in two layers to form a group of light reflective coating conformally overlying outer surface of the first layer of light emissive particles, then attaching a light transparent plate under the second layer of light emissive particles such that coated light emissive particles are spaced apart from the particles closest to the light transparent plate.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2879

This application further contains claims directed to the following patentably distinct species of the claimed invention:

Group 1a, claims 1-20, directed to a structure having light reflective coating;

Group 1b, claims 21-28, directed to a structure having getter coating;

Group 1c, claims 29-40, directed to a structure having intensity-enhancing coating;

Group 1d, claims 41-52, directed to a structure having intensity-enhancing coating and contrast enhancing coating;

Group 1e, claims 53-56, directed to a structure having intensity-enhancing coating and light reflective coatings;

Group 1f, claims 57-62, directed to a structure having a group of contrast enhancement coatings;

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Art Unit: 2879

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Mr. Ron Meetin on 07/21/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of one of the seven groups (Group 1a, group 1b, Group1c, Group 1d, Group 1e, Group 1f, or Group II) the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
